

New PTO configurator

We are pleased to inform you that a **NEW web CONFIGURATOR** is now available to guide you in choosing the ideal PTO for each application.

The new tool is much more than just an index and integrates calculation functions to simplify the selection even for less experienced users.

The interface itself is very intuitive, but in case of doubt, an online user guide is also available:

<http://pto.omfb.com/assets/pdf/99750045022.pdf>

We invite you to request the new access credentials at the following link in order to immediately take advantage of the potential offered by the new PTO configurator.
