

NEW PRODUCT LINE

Tanks NORTH AMERICAN

OMFB hits a new target by adding its range of hydraulic components a wide choice of hydraulic tanks and related accessories dedicated to the North American market.

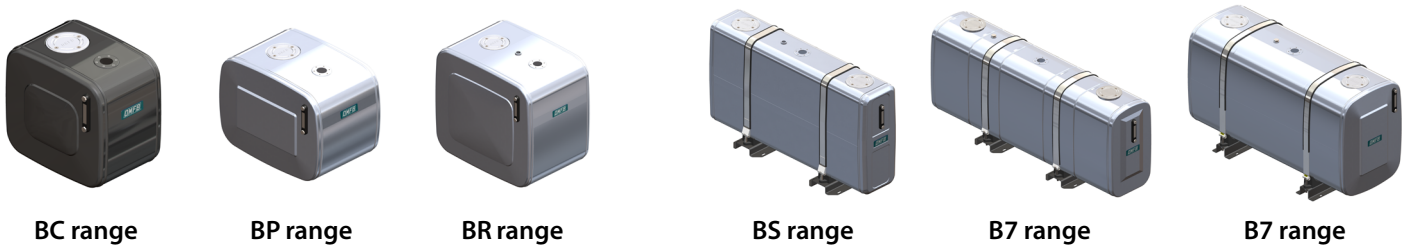

Visit our website www.omfb.com in the [TANKS DIVISION](#):

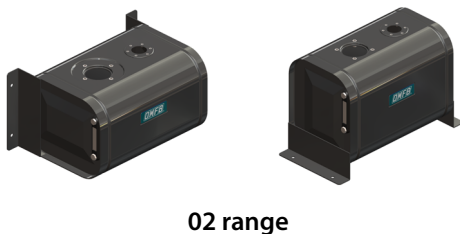

Wide range of tanks from 8 to 100 GAL in primer-painted steel material and aluminium.

OMFB manufacturing technology allows to introduce two new tank shapes: *Premier* and *Tailor-Made*.

Premier: rounded shapes to meet not only technical and functional requirements but also an innovative aesthetic design in line with the expectations of the Veichle automotive industry.

Tailor-Made: mainly used for customization with more square shapes and the option of managing size and capacity for the most complex applications and installations.
